Application No. PCT/US2005/028500

Attention: US/RO

Filed August 12, 2005

TURBULENCE BURNER WITH VORTEX STRUCTURES

STATEMENT UNDER ARTICLE 19(1) (RULE 46.4)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

December 12, 2006

Claim 9 is amended to include reference signs and to include the limitation that "when fuel is burned, a naturally aspirated unregulated, turbulent forced air effect develops".

Claim 12 is amended to clarify that an air/fuel mixture is combusted in a cylinder that is open at both ends to address the lack of clarity objection noted in section V. paragraph 2) of the Written Opinion.

Applicant's invention relates to air flow into a burner by natural aspiration.

The International Search Report and Written Opinion cite two documents, FR 2,291,453 and GB 1,300,145.

As set forth in Section V. paragraph 3) of the Written Opinion, FR '453 does not disclose this feature. Although GB

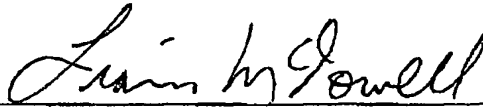

Attorney Docket No. 5566-1002
International Appln. No. PCT/US2005/028500

'145 appears to suggest this feature, nevertheless, the Written Opinion sets forth that based on the structure of these devices, they could not be combined to lead to Applicant's claimed invention.

Claim 9 was the only claim that did not include this feature. As claim 9 is amended to include this feature, Applicant respectfully suggests that the invention as now claimed meets the requirements of novelty, inventive step, and industrial applicability.

Respectfully submitted,

YOUNG & THOMPSON
